

## APG LIVE MANAGER RELEASE NOTES

### v1.8

#### Bug fixes

- Incomplete “Reset to factory settings” on Input parameters
- “Pairing” feature would display improper preset names with presets from the machine internal library
- “Load session from file” would display improper preset names with presets from the machine internal library
- “Reset EQ” feature would reset bypassed bands
- Inversion on blinking MUTE LED state when member of a group is muted/unmuted

#### New features

- Firmware update
- Internal machine presets bank initialisation
- Various cosmetic and ergonomic improvements

### v1.7.3

#### Bug fixes

- Modules mute buttons would blink as soon as module is a member of a group
- Reset to factory settings loads a wrong value of Vx limiter threshold. Factory init activates protections too early on init preset

### v1.7.2

#### Bug fixes

- “Delete Group” feature doesn’t always remove all overlays in machines
- Unrelated Output channels linked together when stereo link is active
- “Load session from file” feature forces user to apply parameters on each machine individually
- “Load session from file” feature doesn’t load machine names properly
- “Stereo link” feature causes machine to go to Network Conflict state at every disconnection

#### New features

- Save/Load of individual machine configurations with\*.almmc files
- Display of groups EQ summation curve on each module EQ curve
- “Reset” feature on EQ
- New SB series presets (SB110, SB112, SB115-M2)
- Legacy presets (DS18, DS12S, DS15, DS15S, DS15R)
- Improved stability
- Various cosmetic and ergonomic improvements
- Crash reports saved into logs folder

### v1.7.1

#### Bug fixes

- Autoupdate feature was disabled since v1.5.1

### v1.7.0

#### Bug fixes

- Minor issues

#### New features

- Sleep all/Wake all amplifiers to activate/deactivate the Deep Power Save Mode on DA series
- Fallover priority selection on input type for DA series
- Bridge mode on DA series

- Global bypass on EQ
- Advanced limiter settings available on FLAT preset
- More cardioid configurations available in preset library
- Improved stability
- Various cosmetic and ergonomic improvements
